

## **COMPACT FLY** | High Pressure Insect Control Air Curtains For Commercial And Industrial Windows

## Characteristics

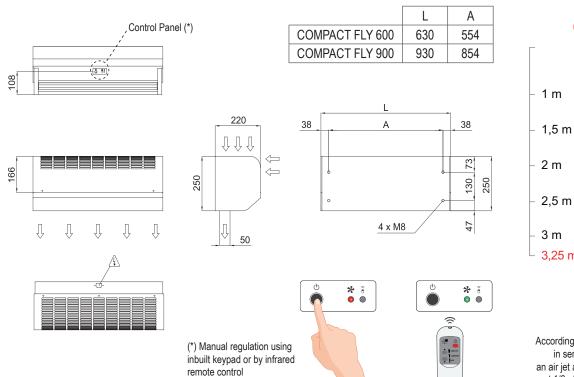

- Specially designed for insects control at windows of food establishments and industries, tolls and kiosks.
- High velocity air barrier to prevent flying insects from entering a building, according to NSF 37 standard.
- Self-supporting casing construction made of galvanized steel plate, finished in structural epoxy-polyester painting white colour RAL9016 as standard. Other colours are available on request.
- · Large perforated inlet grille avoiding intensive maintenance.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable in both directions.
- Double-inlet centrifugal fans driven by an external rotor motor with 2-speed selector (comfort and fly mode).
- "A" type without heating, air only.
- Included regulation with infrared remote control and inbuilt keypad with leds.
